Syndicated Metals Ltd has started drilling at the Mount Remarkable project near Mount Isa in Queensland.

The initial targets will be the Barbara, Mount Margaret and Mount Hutchinson prospects. The most advanced of these is the Barbara prospect, where historical drilling returned intercepts including 18m at 3.2% Cu, 13m at 3.4% Cu and 8.3m at 3.4% Cu over a strike length of 200m.

Managing director Russell Davis said, "With the resilience of the copper price in difficult global trading conditions and the favorable grades seen in historical drilling, the Company is keen to prioritize copper exploration. We believe that, given the historical copper mineralisation identified on the tenements and Syndicated's own research, the Barbara prospect in particular has early potential to generate a copper resource."

STOCK DASHBOARD: March 20, 2008

Syndicated Metals

Price at 10:20 am: 19.50c
